# Chapter 9- Cognitive Map of Learning Theories Assignment

Using Popplet or Prezi, you are going to create an interactive mind map of the three learning theories we have learned about in class. See my course website for an example.

1. Log into either App.

2. Using the information from our textbook and your notes, you will create a visual representation of the cognitive map your mind has created of the three learning theories. Also include the phases of self-regulated learning from our Zimmerman article.

3. Make your map interactive, using pictures and videos to visually represent your understanding of the learning theories. Be sure to connect your ideas, cross-linking where appropriate. You should have at least 20 comprehensive elements on your map.

4. Display your cognitive map on your ePortfolio by linking to it on your Unit 2 Page. Include a landing photo of your map on your Unit 2 Page **in addition to** the link. *(I can help you with that if needed)*

**Assessment                           /30**

|  | **Not Meeting** | **Minimally Meets** | **Meets** | **Exceeds** |
|---|---|---|---|---|
| **Content (20)** | • Depiction is incomplete or incorrect in a major way<br>• Connections are incomplete and illogical<br>• Less than 16 elements<br>• Elements are trivial and do not enhance understanding of the content | • Theories are depicted briefly<br>• Connections are weak, may not make complete sense<br>• Less than 16 elements | • All three theories are accurately depicted<br>• Uses examples to enhance content<br>• Connections are strong and logical<br>• Contains 16 elements | • All three theories are depicted in depth and with breadth<br>• Connections are comprehensive and logical<br>• More than 16 relevant elements |
| **Design (10)** | • No use of design elements<br>• Little to no use of multimedia; may be inappropriate | • Little use of design elements<br>• Some use of multimedia | • Shows pride in work<br>• Good use of multimedia | • Professional looking<br>• Excellent use of multimedia |
