

Rock Star Assignment

Name:

After watching the Rock Star music video in class (see my website if you missed it), I hope you are inspired to drop a beat!

With a partner, or a small group of 3, I would like you to create a short rap* about the Rock Cycle and its components. If you're not into the rap, you could write a poem instead. For both options, you need to have at least 12 lines of text.

**No, you don't have to perform it, but it would be really awesome if you did **

Alternative assignment: Create a short story about a rock following the rock cycle. Give it a context and make it fun. Is it a story about a great rock love affair? Is the rock trying to change it's identify because it's in Witness Protection? Is it a story about a baby rock growing up to find its way in the world? Whatever you choose, be sure to throw in some scientific rock vocabulary.

→ Whichever option you choose, please submit your work on Unit 2 of your eP, under the heading "Rock Star Assignment" (*all group members must do this*).

Your assignment will be graded on:

- completion of each stage of the rock cycle (3),
 - accuracy and correct use of scientific terms (10),
 - and effort/creativity (7)
- for a total of 20 marks
