

Science 10 Exit Interview

As your final task in Science 10, you will participate in a 5-minute exit interview. In preparation for this, I would like you to consider the skills you have practiced, the new knowledge you have created, and the legacy you leave behind. You have done so many great things in this course – reflect on your growth.

Look at your ePortfolio. Is it something that you can be proud to show to your family? Tidy it up:

- Delete your Unit 4 page (we didn't get there!)
- Make sure every post has a title.
- You should have 5 main pages (*1 for each of the units*): Intro, Unit 1, Unit 2, Unit 3, Blog.
- Ensure that your reflections are all found on your "Reflections" Blog page.
- Make sure the "Unit 3 Subpage" for your energy Project is actually under your Unit 3 page
- You might consider including a Science- themed Home page.
- Use spacers & dividers to organize your eP. It should be clean and uncluttered and really easy to navigate.

In our interview, I will ask you the following questions. Your task is to prepare your responses ahead of time. You may refer to your eP during our conversation.

- 1) Tell me about 2 things that you learned about in each unit.
 - How can it apply to your life (or life in general?)
 - What is another question that you have that would further your learning?
- 2) Walk me through your eP.
 - What would you do differently?
 - How would you improve it?
 - What do you like best about it?
- 3) What grade/comment do you believe you deserve to see in your report card for this course?
 - Why? Provide evidence.
 - Better, less than or the same as your midterm? (see me for this)
- 4) Think about this course as a whole:
 - What did you like about it?
 - What do you think could be improved?
