# The Life of a Star Assignment

Using the handouts I have given you as a guide, you are to build your own map of the life of a star. I would like to try out the tool Venngage to help you make a beautiful infographic that will look awesome on your ePortfolio. If you would rather use another infographic generator like Piktochart, that would be fine too.

You can find Venngage and create an account here: https://venngage.com/ Remember, I only ever need you to use the free or trial versions on web tools.

Your assignment will be graded on:

- **completion of each stage of the star (10)**
- **accuracy (10)**
- **professionalism & mechanics** *(grammar, spelling, attention to detail)* **(5)**

             Total: 30 marks

→You should identify each stage of the life cycle and clearly outline the features of each stage. Aim for 4-6 points for each stage.

→Submit your assignment by uploading your work to your ePortfolio, on your Unit 1 page, under the heading "The Life of a Star". Use both the *<embed code>* and button tools in Weebly to do this. I will show you how to do this in class.

Note that you could use my website to help - the pictures and videos posted there may be useful as additional resources for your assignment.

             I am expecting quality work – worthy of a grade 11 assignment.

This assignment is due by the end of the class on **:_____**
